STRUCTURAL DESIGN CALCULATIONS

The calculations present in this document presents a wide range of design process from Engsolution ltd, this includes:

- Design experience and knowledge
- Professional engineering judgement
- Commercial structural software modeling and analysis
- Calculations through spreadsheets, SESOC calculation tools and other program
- Design and drawing reviews
- Typical industry construction details and practices

The calculations attached in this document has been provided as part of the building consent application process for council authority review. They are part of the design process however do not represent the final design. It is the structural drawings and specifications that wholly represent the true design of the structure.
